

Reverse Osmosis Systems

Ultra High Purity Reverse Osmosis Undersink System

The Ultra High Purity Reverse Osmosis (UHPRO) removes all contaminants that are of concern to the consumer - such as chlorine, dissolved solids, fluoride, bacteria, parasites, viruses, inorganic chemicals, pesticides and heavy metals. These impurities are flushed down the drain rather than collected in the filters - preventing any build up.

The system is hand built in Australia and has been made using high quality components, filters and parts.

Ultra High Purity Reverse Osmosis Undersink System #257

Effectively Removes

- Aluminium
- Barium
- Cadmium
- Chlorine
- Chromium
- Copper
- Cryptosporidium
- Cysts
- E. coli Bacteria
- Fluoride
- Giardia
- Heavy Metals
- Hydrocarbons
- Iron
- Lead
- Manganese
- Mercury
- Nitrate
- PCB's
- Potassium
- Radium
- Selenium
- Sodium
- Taste & Odour

Specifications

Production @60 Psi 25°C	200 litres per day
RO System Dimensions (cm)	32(W) x 42(H) x 11(D)
Tank Dimensions (RO -132)	37(H) x 28(D)
Micron Rating	0.0005 Micron
Warranty	1 year*
