

ANI Aquanet Gravity Filter Replacement

1. Carefully remove bottle from Chiller
2. If self-fill bottle, you must completely empty bottle before removing
3. With bottle removed, discard old filter.
4. Remove internal baffle and clean
5. Clean tank and refit baffle
6. Holding new filter over sink, place a small amount of water in new ANI filter, firmly "tap" sides of new filter then fill with water.
7. "Black" water should now be dripping through filter.
8. When empty, re fill flushing a further two times.
9. Water should now be running freely and clear.
10. If not running freely, repeat steps 6-8 again.
11. Refit filter on top of chiller
12. Refit bottle.
